

Snow mask

Processed at ALPsolut on 2023-02-17 05:05:12

Snowline estimation: terrain above (light gray) and below (dark gray) estimated snowline.

(A band of 200 meters altitude is colored gray.)

Snow mask: Coordinates classified as snow (white) or no snow (black).

Scene classification: Terrain classification. (Snow detecting is less refined than in the snow mask, but other types are recognized as well.)

True color image: Natural colors by combining the red, green, and blue bands.
